www.seriousgoodlandscapes.co.uk

A photograph of a garden landscape. In the foreground, a stone staircase with grey stone steps and a low stone wall leads up a slope. To the left of the stairs is a large, tall, pointed rock. Various plants, including a large green plant and a yellow-flowered bush, are scattered around the slope. In the background, a green lawn extends to a hedge and a bench. The text "Plymouth RE-design" is written in a cursive font across the middle of the image.

Garden Design & Build

A low maintenance & low cost contemporary garden redesign that provides colour, diversity and tranquility. The design includes elements for green living, relaxation and socialising. The design is low maintenance and as cost effective as possible- reusing existing materials where possible. The design synchronises the garden's functionality through focal points & utilising corners for appropriate features.
